

Novosibirsk - Chemical plant

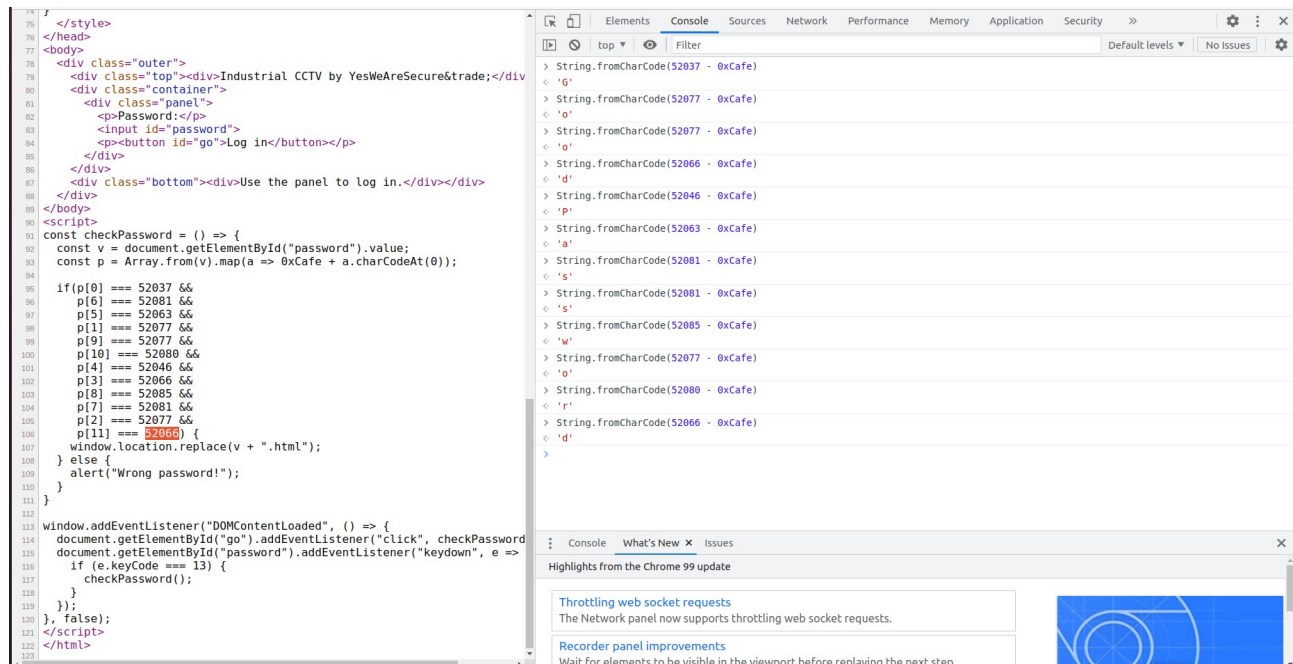

Step 1: Reading the the challenge description.

Step 2: Getting familiar with the challenge, exploring what you can do.

Step 3: Open the source code of the page to understand how the checkPassword function work. As we can see it compares 12 characters of the password after adding the hex 0xCafe

Step 4: Entering the password and getting the flag:
CTF{IJustHopeThisIsNotOnShodan}
